

Revver Reports is a comprehensive, add-on component to Revver that is a data visualization tool and business intelligence, reporting, and analytics engine. Revver Reports allows you to analyze the files and metadata contained in document profiles into dynamic visualizations to better analyze data. Intuitive reporting will help your company make faster and smarter business decisions.

Bring Your Data to Life With the Power of Business Intelligence

Revver Reports transforms your data to make it visual, pliable, and interactive. It's a component of the Revver document management system that allows businesses to work smarter and faster. The data gathered from your documents can now be utilized for business intelligence, with reporting and analytics that allows companies to identify trends and key insights more easily.

Rather than manually searching Revver and comparing the data points within each document, Revver Reports takes that legwork out and gives those who work with data the option of viewing that information in a more easily digestible and informative way. Instead of comparing documents side by side and trying to spot differences or trends, use your time to visualize the raw data as a chart or graph. A picture is worth a thousand words, after all.

HOW IT WORKS

Revver Reports is located in your main menu. The feature works best when combined with Revver's profile feature and Zonal OCR's ability to automate the capture of metadata for those profiles. However, some reports can be built without requiring metadata, such as a file-type breakdown in a cabinet or drawer.

This tool can have many use cases for customers using Revver. For users without extensive metadata set up, it can be used as a central dashboard to oversee how data is stored and organized in Revver, and as a way to make comprehensive reports for presentations. However, when document information is captured using metadata/profile fields, many more use cases become available. Some use cases include HR teams measuring their team performance and training/certification completion, or accounting departments measuring the number of invoices processed or tracking the invoiced amounts over a given month.

Better business intelligence means you'll be able to make better decisions, and Revver Reports is designed to help you identify, visualize, and analyze those insights as easily as possible.

In the reports interface, the ability to create and name a data source from your Revver data enables broad or focused data sets to then build dashboards or reports. After specifying a data set to report on, select from dozens of different visualization methods, called widgets. These include:

COMPARISONS CHARTS

- Column Charts
- Bar Charts
- Stacked Columns
- Stacked Bars

KPI MEASUREMENTS

- Data Bars
- Sparklines
- Indicator Charts
- Deviation Measurements
- Radial Gauge
- Linear Gauge

PROPORTIONS

- Pie Charts

...And much more...

DATA REGIONS

- Tables
- Lists
- Geographic Maps

REPORT CREATION

To create a report, select your desired data set, then drag-and-drop your selected widget onto the field with the selected data set. From there, edit the properties of the visualizations, customizing them to fit your desired needs and aesthetic. Multiple widgets can be added to help create a more full picture of the data and unlock different visual representations of your data.

Change colors, change sizes, fonts, and add custom images to give your reports more clarity, or make them stylized

and ready for presentation. All data conforms to whatever form and arrangement you make your visualizations.

Reports can be exported in several formats including PDF, HTML, and CSV.

Revver Reports specializes in two types of reports:

Report Types

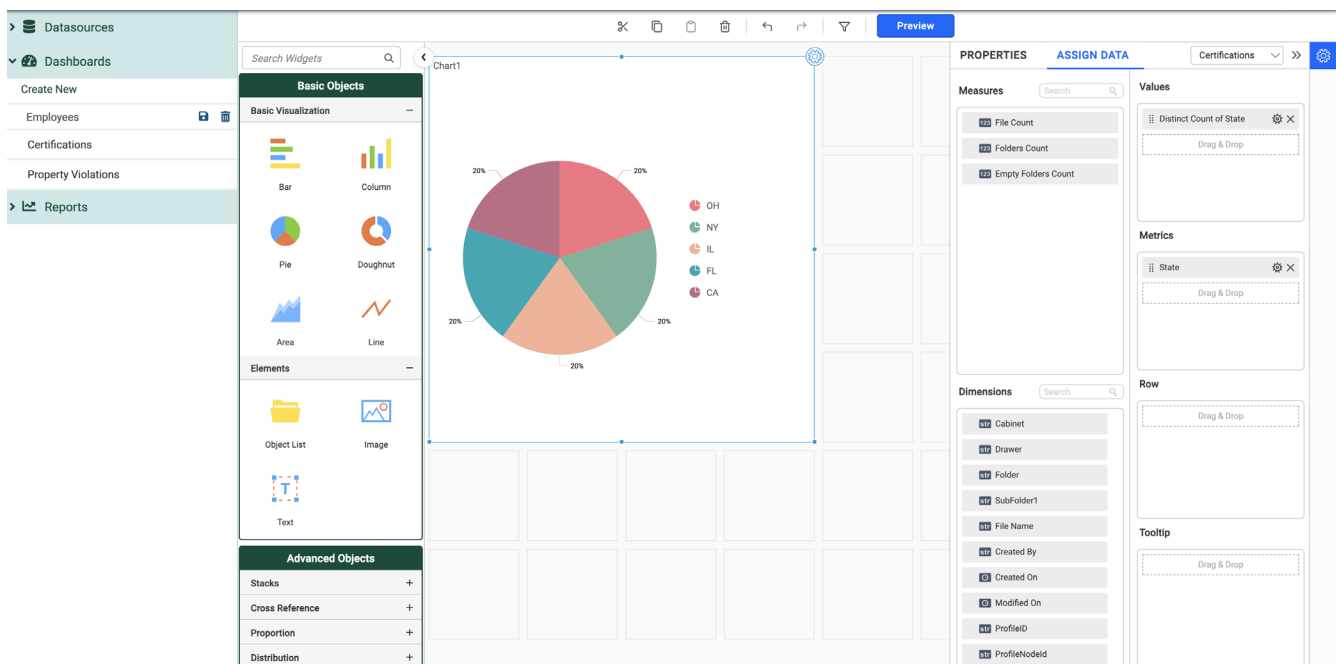

DASHBOARD (DYNAMIC)

These dynamic reports continually change and adjust to reflect any new and modified data in the associated data source.

REPORT (STATIC)

A report is a snapshot of a data set at a particular point in time.

Property Violations Theme (PREVIEW)

Datasources

- Dashboards
- Create New
- Certifications
- Property Violations**

Property:

Violation Type:

Date Range:

Violation Type by Property

Property	Distinct Count of Violation Type
Lovelock Garden	5
Crossroads I	4
Nemont Manor	4
Northwest Passage	4

Data List

Drawer	Last Name	Address/Unit #	Violation Type	Date(Date Attached)
Crossroads I	Adams	32	Harassment	05/21/2021
Crossroads I	Flores	22	Pets	08/11/2021
Crossroads I	Fredrickson	10	Appearance	12/15/2021
Crossroads I	Handey	27	Appearance	05/05/2021
Crossroads I	Jefferson	15	Pets	06/03/2021
Crossroads I	Johnson	25	Noise	10/22/2021
Lovelock Garden	Andrews	513-A	Noise	12/24/2021
Lovelock Garden	Drew	508-B	Harassment	10/10/2021
Lovelock Garden	Jameson	411-B	Noise	10/31/2021
Lovelock Garden	Matthews	403-A	Smoking	07/04/2021

MORE FEATURES

Customizable Interface

Modify the layout, size, and colors of certain elements on the Dashboards and Reports that you create.

Interactive Reports

Drill into different data sets and other options, for multiple ways to view data. Time and date widgets allow you to switch between different states of a report through a period of time.

Scheduled Reports

Set specified timeframes for the system to automatically generate new reports and email them to selected recipients.

Revver Permissions

User permissions set in Revver will still be enforced in Revver Reports, meaning that users will not be able to see data they do not have permission to view.

Contact your account executive today to start your Revver Reports experience.
